Pediatric burns are a unique challenge for healthcare professionals. Children's skin is thinner and more delicate than adults' skin, which makes them more susceptible to burns. They also have a higher metabolism than adults, which means that they lose heat more quickly and are more likely to develop hypothermia.

Burns Pediatric Primary Care is the definitive resource for healthcare professionals providing care to children with burns. This comprehensive guide covers all aspects of pediatric burn care, from prevention and assessment to treatment and rehabilitation.

Written by leading experts in the field, Burns Pediatric Primary Care is an essential resource for pediatricians, family physicians, nurses, and other healthcare professionals who care for children with burns.

Key Features

- Comprehensive coverage of all aspects of pediatric burn care
- Written by leading experts in the field
- Essential resource for pediatricians, family physicians, nurses, and other healthcare professionals who care for children with burns
