Navigating this highly connected world requires new ways of thinking and reasoning. We need to be able to understand the complex interactions between people, organizations, and technologies, and to make informed decisions in the face of uncertainty and ambiguity.

Reasoning About a Highly Connected World provides a comprehensive framework for understanding the challenges and opportunities of the digital age. Drawing on research from a wide range of disciplines, including social network analysis, data science, and network science, this book offers a

unique perspective on the role of data, computation, and networks in shaping our world.

Key Features

- Provides a comprehensive overview of the latest research on data, computation, and networks
- Offers a unique perspective on the role of these technologies in shaping our world
- Written by leading experts in the field
- Accessible to a wide range of readers, from students to policymakers

Table of Contents

- 1.
2. Data: The New Raw Material
3. Computation: The Power of Algorithms
4. Networks: The Structure of Society
5. Reasoning in a Highly Connected World
6. Applications of Network Science
7. The Future of a Highly Connected World

Reviews

"Reasoning About a Highly Connected World is a must-read for anyone who wants to understand the challenges and opportunities of the digital age. This book provides a comprehensive overview of the latest research on data, computation, and networks, and offers a unique perspective on the

role of these technologies in shaping our world." - **Mark Granovetter, Stanford University**

"This book is a valuable resource for anyone who wants to understand how data, computation, and networks are changing the way we live and work. The authors provide a clear and concise overview of the key concepts in network science, and they offer a wealth of examples and case studies to illustrate their arguments." - **Duncan Watts, University of Pennsylvania**
