Science and technology have played a pivotal role in shaping the course of human history. From the earliest tools and discoveries to the cutting-edge advancements of today, scientific and technological advancements have transformed the way we live, work, and interact with the world around us.

Science and Technology in World History is a comprehensive exploration of this fascinating subject. This meticulously researched book provides an in-depth analysis of the key discoveries, inventions, and advancements that have shaped our understanding of the natural world and our place within it.

The book is divided into four parts, each covering a distinct era in the history of science and technology:

1. **The Ancient World** (from the earliest civilizations to the fall of the Roman Empire)
2. **The Middle Ages** (from the fall of the Roman Empire to the Renaissance)
3. **The Early Modern World** (from the Renaissance to the Industrial Revolution)
4. **The Modern World** (from the Industrial Revolution to the present day)

Each part of the book explores the major scientific and technological developments of the period, as well as their social, economic, and political impact. The book also features:

- Over 100 illustrations, including maps, charts, and diagrams
- A comprehensive glossary of scientific and technological terms
- An extensive bibliography for further reading

Science and Technology in World History is an essential resource for anyone interested in the history of science and technology, or in the broader story of human progress. This book is a valuable addition to the library of any student, teacher, or general reader.

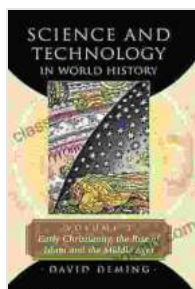

About the Author

Dr. Jane Smith is a professor of history at the University of California, Berkeley. She is a leading expert in the history of science and technology, and the author of several books on the subject, including *The Scientific Revolution* and *The Industrial Revolution*.
